

KIDUS MESFIN

Software Engineer

✉ kidusmesfinteferi@gmail.com ☎ +251960156400 📍 Ayat Addis Ababa, Ethiopia 🔗 kidusmesfinportfolio.vercel.app

SUMMARY

Driven and adaptable **Software Engineer** with 3+ years of experience in **full-stack development**, **system design**, and **algorithmic problem solving**. Skilled in building scalable web applications using **React**, **Next.js**, **Node.js**, and **MongoDB**. Currently pursuing a **BSc in Computer Science at HiCoE** and trained with **A2SV** on advanced data structures and algorithms. Passionate about leveraging technology to solve impactful problems across Africa.

EDUCATION

Bachelor in Computer Science, *HiCoE School of Computer Science & Technology* 2022–Present

- HiCoE is a leading Ethiopian institution focused on innovation and practical computer science education, with close collaboration with tech industry experts.
- **Relevant Coursework:** Data Structures & Algorithms, System Design, Object-Oriented Programming, Software Engineering, Web Development.

Advanced Data structure and Algorithm, *A2SV* 04/2025 – 01/2026

Selected participant in a competitive 6-month mentorship program focused on advanced algorithms, problem-solving, and global tech exposure.

EXPERIENCE

Senior Software Developer, *Andro Solutions* 03/2025 – Present

- Led a cross-functional team to develop scalable web platforms for clients using **Next.js**, **Node.js**, and **MongoDB**.
- Optimized backend performance and implemented CI/CD pipelines, reducing deployment times by 40%.
- Mentored junior developers on best practices in software architecture and version control.

Lead Systems & Platform Engineer, *Oz Kitchen* 04/2026

- Sole engineer responsible for architecting, developing, and maintaining an end-to-end operational platform for a food production and delivery business.
- Designed and implemented scalable full-stack applications connecting customer ordering, kitchen operations, administrative management, and delivery logistics into a unified real-time system.
- Built responsive frontend applications using React and modern JavaScript frameworks with a strong focus on performance, usability, and operational efficiency.
- Developed backend services, APIs, authentication systems, and database architecture using PostgreSQL, Supabase, and modern cloud-based infrastructure.
- Engineered workflow automation solutions, including Telegram bot integrations for operational coordination, notifications, and internal process management.
- Created internal dashboards and management systems for order tracking, kitchen workflows, delivery assignment, and administrative oversight.
- Led system architecture, database design, deployment workflows, debugging, optimization, and feature delivery across the entire software lifecycle.
- Implemented scalable and maintainable engineering practices while independently managing product development, infrastructure decisions, and cross-system integrations.
- Collaborated directly with business stakeholders to translate operational requirements into reliable technical solutions that improved workflow efficiency and system coordination.

Head of Education, *A2SV* 01/2026 – 05/2026

- Led the design and delivery of **Data Structures and Algorithms (DSA)** training programs for software engineering students.
- Conducted structured lectures, problem-solving sessions, and technical reviews focused on algorithmic thinking and interview readiness.
- Mentored students through competitive programming and real-world problem decomposition, improving consistency and performance.
- Contributed to curriculum planning, learning standards, and academic direction across cohorts.

Full Stack Developer, *Temaribet* 12/2025

Education Technology Platform

- Developed and maintained internal **moderator dashboards** and **backend infrastructure** supporting a large-scale education platform for Ethiopian high school students preparing for national exit examinations.

Addis Ababa, Ethiopia

- Built scalable backend services using **Python (FastAPI)** with **Redis** for caching and performance optimization, and **RabbitMQ** for asynchronous task processing and event-driven workflows.
- Designed and implemented APIs and background workers to support content moderation, analytics, and system reliability.
- Developed cross-platform mobile features using **React Native** and modern web applications with **Next.js**, leveraging the **TypeScript** ecosystem for type safety and maintainability.
- Collaborated on building a well-rounded digital learning tool focused on accessibility, performance, and real-world exam readiness for students.
- Worked across the full stack, contributing to architecture decisions, feature development, and iterative improvements in a production environment.

Junior Software Developer, The Idea Vault

- Designed and maintained company websites and visual assets, improving user engagement by 25%.
- Managed brand consistency and led cross-border social media campaigns.

2022 – 01/2024
Kenya-Ethiopia

Organisations

A2SV (Africa to Silicon Valley) [🌐](#), *Member*

- Engaged in high-level algorithmic training and collaborative software projects with top African engineers.
- Gained mentorship from global tech professionals and contributed to real-world solutions.

05/2025 – Present
Addis Ababa, Ethiopia

SKILLS

Languages Python, JavaScript, TypeScript, C++, PHP, Java, C#, Dart, Go	Frameworks & Libraries React, Next.js, Node.js, Express.js, Flask, Flutter, React Native, Fast Api, Gin
Databases MongoDB, SQL, Firebase	Tools Git, Figma, Postman

Projects

Homely, Rental Platform

- Designed a platform connecting renters and homeowners with live search and booking systems.
- **Technologies:** React, Node.js, MongoDB, Firebase.
- Integrated real-time notifications and payment gateways.

01/2024 – Present

Streamsynx, Movie Streaming Site

- Developed a modern movie streaming platform that fetches real-time data from **The Movie Database (TMDB)** API.
- Implemented dynamic movie listings, search and filtering, and responsive UI for seamless viewing.
- Integrated authentication, favorites, and watchlist features using **Next.js**, **Firebase**, and **Tailwind CSS**.
- **Technologies:** React, Next.js, Firebase, TMDb API, Tailwind CSS.

01/2023 – 03/2023

Oz Kitchen [🌐](#), *Integrated Food Operations & Delivery Management Platform*

Architected and engineered a scalable full-stack operations platform that unified customer ordering, kitchen management, administrative oversight, and delivery logistics within a single ecosystem. Developed modern frontend interfaces, backend services, database architecture, and automation systems using React, PostgreSQL, Supabase, and microservice-oriented integrations.

Implemented real-time operational workflows, role-based management systems, delivery tracking infrastructure, and Telegram-based automation to optimize communication, fulfillment efficiency, and system reliability across the business lifecycle.

04/2026

Prepx, Educational Platform

Education Technology Platform for National Exit Exams

A full-stack education platform designed to help Ethiopian high school students prepare for national exit examinations. The system includes mobile and web applications built with React Native and Next.js, backed by a scalable FastAPI backend using Redis for performance optimization and message queues for background processing. The platform features content moderation tools, structured learning materials, and exam-focused workflows to support accessible and reliable student learning at scale.
