

KIDUS MESFIN TEFERI

Software Engineer

✉ kidusmesfinteferi@gmail.com ☎ +251960156400 📍 Ayat Addis Ababa, Ethiopia 🔗 kidus-mesfin.me

SUMMARY

Driven and adaptable Software Engineer with 4+ years of experience in full-stack development, system design, and algorithmic problem-solving, with a Bachelor's degree in Computer Science from HiLCoE School of Computer Science & Technology. Skilled in building scalable web applications and backend systems using React, Next.js, Node.js, Python, PostgreSQL, and MongoDB. Trained with A2SV in advanced data structures and algorithms, with experience leading technical teams and building production systems across web, mobile, infrastructure, and automation. Passionate about leveraging technology to solve impactful real-world problems.

EDUCATION

- Bachelor in Computer Science, HiLCoE School of Computer Science & Technology** 09/2022 – 09/2026
Addis Ababa, Ethiopia
- HiLCoE is a leading Ethiopian institution focused on innovation and practical computer science education, with close collaboration with tech industry experts.
 - Relevant Coursework:** Data Structures & Algorithms, System Design, Object-Oriented Programming, Software Engineering, Web Development.
- Advanced Data structure and Algorithm, A2SV** 04/2025 – 01/2026
Selected participant in a competitive 6-month mentorship program focused on advanced algorithms, problem-solving, and global tech exposure. Kigali, Rwanda

EXPERIENCE

- Lead Systems & Platform Engineer, Oz Kitchen** 04/2026
Addis Ababa
- Architected and maintained an end-to-end food production and delivery platform as the sole engineer, unifying customer ordering, kitchen operations, admin management, delivery logistics, and internal communication into one real-time system.
 - Built scalable full-stack applications using React, Node.js, PostgreSQL, Supabase, Redis, and Upstash, improving platform performance, reliability, and maintainability across frontend, backend, and database layers.
 - Implemented CI/CD pipelines with GitHub Actions and introduced multi-stage deployment workflows across development, staging, and production, reducing deployment risk and improving release consistency.
 - Strengthened platform security by implementing authentication, role-based authorization, protected admin access, and controlled permissions across different user roles and operational workflows.
 - Developed analytics, reporting, Telegram bot integrations, and customer communication automation to help stakeholders track performance, improve workflow efficiency, and make more data-driven business decisions.
- Founding Full-Stack Software Engineer, Andro Solutions** 03/2025
Addis Ababa, Ethiopia
- Led a cross-functional team to develop scalable web platforms for clients using **Next.js**, **Node.js**, and **MongoDB**.
 - Optimized backend performance and implemented CI/CD pipelines, reducing deployment times by 40%.
 - Mentored junior developers on best practices in software architecture and version control.
- Software Engineer — Full-Stack, Infrastructure & Automation, Temaribet** 12/2025 – 05/2026
Education Technology Platform Addis Ababa, Ethiopia
- Developed and maintained internal **moderator dashboards** and **backend infrastructure** supporting a large-scale education platform for Ethiopian high school students preparing for national exit examinations.
 - Built scalable backend services using **Python (FastAPI)** with **Redis** for caching and performance optimization, and **RabbitMQ** for asynchronous task processing and event-driven workflows.
 - Designed and implemented APIs and background workers to support content moderation, analytics, and system reliability.
 - Developed cross-platform mobile features using **React Native** and modern web applications with **Next.js**, leveraging the **TypeScript** ecosystem for type safety and maintainability.
 - Collaborated on building a well-rounded digital learning tool focused on accessibility, performance, and real-world exam readiness for students.
 - Worked across the full stack, contributing to architecture decisions, feature development, and iterative improvements in a production environment.
- Head of Education, A2SV** 01/2026 – 05/2026
Addis Ababa
- Led the design and delivery of **Data Structures and Algorithms (DSA)** training programs for software engineering students.
 - Conducted structured lectures, problem-solving sessions, and technical reviews focused on algorithmic thinking and interview readiness.

- Mentored students through competitive programming and real-world problem decomposition, improving consistency and performance.
- Contributed to curriculum planning, learning standards, and academic direction across cohorts.

Organisations

A2SV (Africa to Silicon Valley)  , <i>Member</i>	05/2025 – Present
• Engaged in high-level algorithmic training and collaborative software projects with top African engineers. • Gained mentorship from global tech professionals and contributed to real-world solutions.	Addis Ababa, Ethiopia

SKILLS

Languages Python, JavaScript, TypeScript, C++, PHP, Java, C#, Dart, Go	Frameworks & Libraries React, Next.js, Node.js, Express.js, Flask, Flutter, React Native, Fast Api, Gin
Databases MongoDB, SQL, Firebase	Tools Git, Figma, Postman

Projects

Streamsynx , <i>Movie Streaming Site</i>	01/2023 – 03/2023
• Developed a modern movie streaming platform that fetches real-time data from The Movie Database (TMDb) API. • Implemented dynamic movie listings, search and filtering, and responsive UI for seamless viewing. • Integrated authentication, favorites, and watchlist features using Next.js, Firebase, and Tailwind CSS. • Technologies: React, Next.js, Firebase, TMDb API, Tailwind CSS.	
Oz Kitchen  , <i>Integrated Food Operations & Delivery Management Platform</i>	04/2026
Architected and engineered a scalable full-stack operations platform that unified customer ordering, kitchen management, administrative oversight, and delivery logistics within a single ecosystem. Developed modern frontend interfaces, backend services, database architecture, and automation systems using React, PostgreSQL, Supabase, and microservice-oriented integrations. Implemented real-time operational workflows, role-based management systems, delivery tracking infrastructure, and Telegram-based automation to optimize communication, fulfillment efficiency, and system reliability across the business lifecycle.	
Prepx , <i>Educational Platform</i>	12/2025
Education Technology Platform for National Exit Exams A full-stack education platform designed to help Ethiopian high school students prepare for national exit examinations. The system includes mobile and web applications built with React Native and Next.js, backed by a scalable FastAPI backend using Redis for performance optimization and message queues for background processing. The platform features content moderation tools, structured learning materials, and exam-focused workflows to support accessible and reliable student learning at scale.	
Prospect AI  , <i>AI-Powered Prospect Research & Outreach Platform</i>	04/2026 – 05/2026
Developed an AI-powered prospect research and outreach platform that extracts context from websites, GitHub profiles, notes, and screenshots, then generates personalized outreach messages and follow-up replies using OpenRouter text and vision models. Built with Next.js, React, TypeScript, Better Auth, Drizzle ORM, and PostgreSQL/Neon.
